Product Overview

Strong. Simple. Functional. Modular

Easy. Flexible. Effective.

- Modular Construction & Flat Pack.
- Fits through 30" doors.
- Durable, long-lasting construction - Heavy Duty 16 gauge, 2" square structural steel.
- Easy Assembly - Component Driven w/ 3/8" hardware & Laser-Cut Brackets (included).
- The perfect choice for large and small shops alike.

Stål Commercial Production Tables are the superior choice.

The steel construction of Stål Commercial Production Tables are designed to outlast and outperform traditional wooden shop tables and look good doing it!

Stål Tables are not subject to the standard degradation that occurs with age or the elements found in standard wooden construction and will not warp with cycles of seasonal humidity or sag from age.

Stål Tables Commercial Tables provide your shop with an attractive, durable and flexible solution. Stål Tables are sold as **Frame-Kits** constructed of 2" structural tube steel and include all hardware and components with the exception of work surface and shelving material which we believe can be sourced more cost effectively locally*.

Stål Tables Frame Kits

Stål Commercial Production Tables are sold as heavy duty **Frame-Kits.** The work surface and shelving material is **not** included. We believe sourcing locally is more cost effective.

The amount of work surface / shelving material required will depend on the table size and number of shelves of your model. as well as the size of sheetwood available in your area.

Options

- Finishes Available: Powder Coated in standard or custom colors.
- Size and height: Our tables are 5' x 5' or 5' x 10' to start, with a 36" standing height - Table lenth, width, and height can be tailored to suit a shops needs.
- Overhang: Frames are sized to accommodate a 2" overhang for tables surface in order to provide a surface for clamps -- zero overhang / flush or other configurations are available as well.
- High-Capacity Casters are available as an option instead of Leveling Feet.

Table & Component Capacities

Gross load on tables should not exceed 500 lbs. on each half of a 5'x10' table or 1000 lbs. total. If larger capacities are required, the tables can be specified with heavier steel components

- Tube Caps (for leveling feet and casters) – 2000 lbs. static load each.
- Leveling feet – 250 lbs. each.
- Optional 5" locking caster wheels - 330 lbs. each.

Custom Tables

Complete Customization of table size and design is available to meet the needs of your shop. Stål Tables has created tables and accessories to meet many special requests or applications.

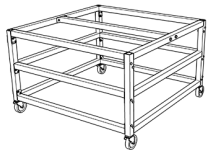
Our Tables Grow With Your Business

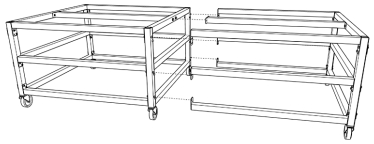
A Modular Solution for a demanding world

Add Modules to increase table size



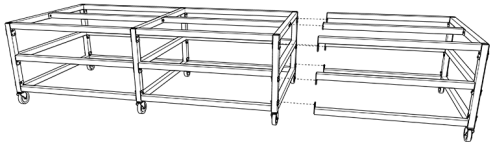
Start.

No matter what your shop's initial needs are, we've got you covered. Start with a 5x5 model, 5x10, or with whatever size and options your shop needs.



Grow.

No matter what model you start with we can help you grow. You can order additional modules to increase your work space. Add top, support, shelf rails, and an additional leg assembly to your already existing table. Simply assemble and bolt to your existing table.



Maximize.

Our tables are built to last a lifetime. As your business grows we're here for you to help you meet the challenges of growth with durability, design, and ease – just add additional modules to meet your needs.

Easy Customization.....

Modules

All of our commercial table models are modular, adaptable, and produced for easy expansion.

Additional Modules can be added simply by bolting them on to your existing table.

A module consists of: top rails, support rails, shelf rails, and the leg assembly that matches your original table specs – we can also alter, modify, or customize to suit your needs.

Stål Commercial Production Tables are designed for modular growth.

Stål Tables are created with an understanding of the challenges that face many production, fabrication, and shop environments.

Our tables are designed with flexibility and growth in mind. Whether you have a large shop or a small shop with big dreams we can help you grow by providing adaptive and modular design solutions and flexibility.

Stål Tables *Bolt-Together* modular design allows for easy growth and modification. You can order additional components or modules to expand your table length, add shelving, or easy and adaptive accessories.
